

REVOLT 2

To learn how to kitesurf and progress quickly, you need simplicity, safety and accessibility. Easy re-launching is also a must have.

Simplicity

The F-ONE REVOLT 2 is a simple 4-line kite featuring innovative Delta C-Shape technology, combined with the EVO full depower system for no-compromise safety and control.

Safety

The EVO is a 4-line depower system with a 4m safety lifeline, featuring a V-shaped bridle with a pulley system on each of the front lines. EVO depower offers complete control with direct and responsive steering in all riding conditions.

When the quick release is activated, this simple system allows the kite to land safely on its back with an immediate and total power kill.

Accessibility

Delta C Shape technology combined with EVO depower offers incredible stability in all wind conditions and ensures that the rider remains in total control of the kite at all times. On the water the REVOLT 2 inspires confidence with smooth and responsive power delivery, even when the kite is fully depowered. No matter what your skill level, the REVOLT 2 offers a rewarding and forgiving ride that will safely aid progression through the sport.

Re-launching

For increased safety and convenience, Delta C-Shape technology provides Auto Relaunch. Once the REVOLT 2 is sitting with the leading edge flat on the water, the Delta C-Shape design allows the kite to automatically turn over onto one wing tip and slide towards the edge of the wind window, where it will sit without any power, awaiting rider input. When you are ready to go, simply pull on the bar and the kite will safely relaunch. For any rider looking for a kite offering uncompromised safety with performance to match, the REVOLT 2 is the ideal choice.

Available Sizes : 3 - 4 - 5 - 7 - 9 - 11 - 13 sqm

TECHNOLOGIES

REVOLT 2

Customers and schools demand was clear: Don't change the Revolt!

We have made some improvements notably in the way the struts are designed and in their overall durability. These modifications improve the profile stability especially in strong wind conditions.

The REVOLT 2 has lighter bar pressure and softer steering. All its other qualities were preserved: tolerance, stability, progressive and constant traction, legendary relaunch, wide wind range and depower ability.

COLORS COMBO

Wind range in knots :

13: 8>22 / **11:** 10>24 / **9:** 14>30 / **7:** 20>35 / **5:** 25+ / **4:** 30+ / **3:** 30+

REVOLT 2 Specifications

In addition to kite modifications on the REVOLT 2 (construction and the diameter of the struts,...), the following advances were made to the control bar and accessories.

1 : BRIDLE

New bridle :

Made of three sections using a polyester-enveloped Dyneema (3 mm for the central section and 2 mm for the external section). The new plastic pulleys improve the guidance.

2 : ACCESSORIES

Leash :
shorter

Kite Bag :
added a net

3 : CONTROL BAR

New grip / Central axis :
color coding more visible
central axis with increased flare

Longer bar floats :
To prevent tangling and increase the floatability of the bar

Depower strap :
Color-coding change.
Red strap = depower; Black strap = power

Chicken loop:
Shorter (10 cm instead of 12 cm)

4 : CONSTRUCTION

Struts with a wider diameter
Segmented construction
